COURSE DETAILS

Organizations with high project management maturity have improved business results, are better positioned to identify and mitigate risk and attract and retain high-quality talent. In fact, organizations that leverage project management (PM) best practices complete projects on-time 28% more often and deliver on-budget 24% more often than organizations that do not have a strong focus on project management standards.[1]

A fantastic way to improve your organization's efficiency and effectiveness is to have Project Management Professional (PMP)® credential holders guide your organization's use of project management standards and procedures. As a member of PMI's Authorized Training Partner (ATP) program with Premier Status, you can be confident that this course is a PMI® Authorized PMP® Exam Prep Course.

Our course takes complex project management topics tested on the PMP exam and teaches them in a way which instills confidence in students' understanding of the concepts. Throughout our PMP exam prep course, taught The PMA WayTM, you will experience an infusion of detailed concept explanations, real-world examples, and an abundance of supplemental study aids to make sure you understand the concepts and are set-up for success to pass the exam.knowledge checks to make sure you understand the materials and are set-up for success to pass the exam.

Organizational Benefits

- Improved employee skills and qualifications
- Better utilization of tools and techniques
- A common project management language to improve communication
- Frameworks to identify, manage, and mitigate risk
- Immediate applicability to ongoing projects

What Students Will Learn

- Master critical concepts, tools & techniques, and key terminology
- Calculate and apply essential formulas
- Complete understanding of how to take the PMP exam

Who Should Attend

This course is intended for individuals who wish to obtain their Project Management Professional (PMP)® credential.

Course Prerequisites

There are no prerequisites to take our course. However, PMI requires you to meet some initial requirements before you are eligible to sit for either exam. View the Exam Eligibility Requirements

TRAINING BENEFITS

1. Project Management Institute's Pulse of the Profession, 2018
This course is hosted by Project Management Academy

Firm Course Dates and Free Course Rescheduling

Our exam prep courses are 100% guaranteed to run on the dates listed, regardless of the number of students and demand. We also offer free course rescheduling for our public courses.

Instant Online Access Upon Registration

We provide access to our comprehensive training portal as soon as students register. Additionally, access to our online portal lasts for 6 months after the course ends.

Free Post-Class Tutoring and Support

We stand by our customers and support them throughout the entire certification process by offering live tutoring webinars weekly. Also, we offer application preparation guidance.

Full Money-Back Guarantee

While many companies just allow you to re-take a course if you do not pass, we provide a true 100% money-back guarantee.[2]

LESSON 0: THE PMI PROJECT MANAGEMENT MINDSET*

This bonus lesson level sets students on the underpinnings of project management and agile to ensure full comprehension of the subsequent training topics. Students with many years of project management experience benefit from this lesson as it instills the PMI-defined ways of describing project management, which is what is tested on the PMP exam.

LESSON 1: CREATING A HIGH-PERFORMING TEAM

This lesson focuses on the people involved to make projects successful. Critical concepts that you will be tested on the PMP exam related to this lesson include: building a team, defining ground rules, negotiating project agreements, empowering and training team members and stakeholders, managing in a virtual environment, and building a shared understanding of project goals to drive towards project success.

LESSON 2: STARTING THE PROJECT

This lesson focuses on planning a project. Key concepts that you will be tested on the PMP exam related to this lesson include: determining appropriate project methodology and practices, planning and managing project scope, budget, and schedule, establishing quality standards, defining project activities, managing project procurement, and establishing project governance and closure practices.

LESSON 3: DOING THE WORK

This lesson focuses on project execution. Important concepts that you will be tested on the PMP exam related to this lesson include: assessing and managing risk and issues, delivering business value, managing stakeholder communications, creating project artifacts, managing project changes, and planning for project continuity.

LESSON 4: KEEPING THE TEAM ON TRACK

This lesson focuses on leadership and collaboration. Major concepts that you will be tested on the PMP exam related to this lesson include: learning leadership styles to encourage team performance, supporting issue mitigation to enable the team's best work, navigating conflict management, promoting team collaboration, supporting mentorship and applying emotional intelligence.

LESSON 5: KEEPING THE BUSINESS IN MIND

This lesson focuses on project compliance and outcomes. Essential concepts that you will be tested on the PMP exam related to this lesson include: managing compliance requirements, evaluating and delivering project benefits and value, addressing internal and external business changes, supporting organizational change, and employing continuous process improvement.

LESSON 6: PREPARING FOR THE PMP EXAM*

This bonus lesson focuses on getting you ready to pass your PMP exam. Review what to expect on the exam, preparation tips, application and certification maintenance guidance, and an overview of the PMA Study Resources available.

*These lessons are only available to PMA students and is proprietary pedagogy based on 10+ years of helping students pass the PMP exam on their first try!
